Profile Summary

Third Year Diploma IT student at Government Polytechnic Kolhapur with knowledge of Python, React.js, FastAPI, DBMS, and software engineering. Interested in software development, AI & ML, and Information Security. Eager to apply technical skills and gain hands-on industry experience through an internship.

Education

Government Polytechnic, Kolhapur — **2024 – Current**
Diploma in Information Technology — *Percentage : 93.84*

P. B. Patil Highschool — **2024**
SSC — *Percentage : 94.00*

Skills

- **Programming Languages:** Java, C/C++, Python
- **Web Development:** HTML5, CSS, JavaScript, ReactJS, ,ExpressJS, FastAPI
- **Databases:** MySQL
- **Core CS Concepts:** Operating System, Computer Networks, Information Security
- **Soft Skills:** Leadership, Adaptability, Strong analytical skills

Projects

Engineers-Timeline | *React.js, JavaScript, HTML5, CSS3, Responsive Web Design*
- Designed and developed a responsive timeline-based web application to track engineering tasks, projects, and milestones with an intuitive UI.
- Implemented dynamic rendering in React.js for structured chronological data visualization and smooth user interaction.
- Built reusable components and optimized layouts for cross-device compatibility using responsive design principles.

Movie Ticket Booking System | *C++, OOP, File Handling, Console UI, eSpeak*
- Developed a menu-driven C++ console application with Admin and Customer modules simulating real-world ticket booking functionality.
- Applied OOP principles and implemented file handling (`fstream`) for modular design and persistent data storage.
- Integrated text-to-speech (eSpeak) to enhance accessibility and improve user interaction.

CurrencyFlow – Live Currency Converter | *React.js, JavaScript, APIs*
- Built a responsive web application for real-time currency conversion supporting 40+ currencies using live API integration.
- Implemented asynchronous API calls and features like instant conversion, currency swap, and quick amount selection.
- Optimized UI performance and ensured seamless experience across devices using responsive design techniques.

Smart College Timetable Management System – Currently Working | *React.js, Tailwind CSS, FastAPI, Python, SQLite*
- Developing a full-stack web application to automate timetable generation and streamline academic scheduling.
- Designed FastAPI-based REST APIs and implemented conflict detection to prevent overlapping lectures.
- Built a responsive frontend and enabled Excel export for easy timetable sharing and management.

DNA Survey Web Application | *PHP, HTML, CSS, JavaScript, MySQL*
- Developed and deployed a web-based application for DNA survey data collection and management.
- Implemented a login interface to support user authentication and access to the application.
- Designed a web interface to facilitate survey-related operations and data management.

Achievements

- **President, ITSA (2026)**: Elected President of the Information Technology Students Association, leading student initiatives, technical events, and team coordination.
- **Star of the Batch**: Awarded by English Educare Academy for outstanding academic performance and overall excellence.
- **Rising Technical Event (2025-26)**: Participated in a national-level coding competition, demonstrating problem-solving and programming.
